FEATURES

COLLECTING WINNING SYMBOLS

All winning symbols are counted as they are removed from the grid.

Grid boosters are awarded as follows:

- Collect **10 symbols** to get the first grid booster.
- Collect **20 symbols** to get the second grid booster.
- Collect **30 symbols** to get the third grid booster.

The grid boosters are chosen randomly from three options described below, with each feature being awarded only once per spin. The symbol collection is reset with each new spin.

Fill the Feature Bar to unlock grid boosters or trigger the Free Spin feature.

GRID BOOSTER FEATURES

COLOSSAL

When the booster is awarded, **1-3 big symbols (2x2 size)** are added to the grid.

Any paying symbol can be added. When two or more symbols are added, the symbols may be different.

REPLACE

When the booster is awarded, **6-10 random symbols** are selected on the grid and turned into the **same random symbol**.

Symbols can be turned into any paying symbol.

WILDS

When the booster is awarded, **3-6 Wild symbols** are added to random positions on the grid.

Wild symbols may also have multipliers.

Possible multiplier values: **2x, 3x, 4x, 5x, 10x, 25x, 50x, 100x.**

When several Wild symbols with multipliers are part of a win, their multipliers are added together and then applied to the win.

Wild symbols replace any paying symbol.

FEATURES (continued)

SETH'S BLESSING

When 40 symbols are collected in a single spin, the Free Spin feature is triggered.

Four grid boosters guaranteed during the Free Spin feature!

The following grid boosters are awarded one by one in random order during the Free Spin feature:

This booster is available only in the Free Spin feature.

SECOND CHANCE

At the end of the free spin feature, there is a random chance to trigger one more free spin.

When the booster is awarded, **5-10 random multipliers are added to random symbols** on the grid.

When a symbol already has a multiplier, the new one will be added to the existing multiplier.

Possible multiplier values: **2x, 3x, 4x, 5x, 10x, 25x, 50x, 100x.**

After the multipliers are dropped, all the symbols with multipliers and all the Wild symbols stay in their places, but all other symbols are removed, and new symbols are dropped.

Multipliers stick to the symbol even when it cascades down.

When a symbol with a multiplier participates in a win, the multiplier is applied to that win.

If several multipliers participate in a win, they are added together and then applied to the win.

FEATURES (continued)

During the Free Spin feature, all winning symbols are collected to fill the Feature Bar.

When **100 symbols** are collected during the Free Spin feature, a **3x3 Big Wild symbol** is awarded.

When all the other 4 boosters are applied, the 3x3 Big Wild symbol is added to a random place on the grid.

All multipliers on the symbols that stay beneath it will be added up and applied to the Wild symbol.

When the Big Wild booster is triggered, the collecting of winning symbols is reset. All Big Wild symbol positions count as Wild symbols.

After participating in the win, the **Big Wild symbol** will split into **5 single Wild symbols** with the same multiplier, and these will be added to random places on the grid.

Wild symbols replace any paying symbol.
