GAME DESCRIPTION

Step into the enchanting world of "**Piggy Cluster Hunt**," where the simple joys of rural life blend seamlessly with the exhilarating thrill of gaming. Follow our endearing piggy protagonist on a charming adventure, hunting for fortunes amidst a backdrop of serene countryside living.

Embark on a journey through a unique **7x7 grid**, where **cluster pays** redefine your winning strategy. Match 5 or more symbols to form winning clusters that cascade away, creating space for new symbols and opportunities for consecutive wins. The game's heart lies in its exciting features. Watch as progressive win multipliers increase with each win, exponentially boosting your potential rewards. **Explosive Wilds** add an element of surprise, turning even the most ordinary spins into thrilling wins, while regular Wilds keep the action flowing by substituting for other symbols to form those all-important winning clusters.

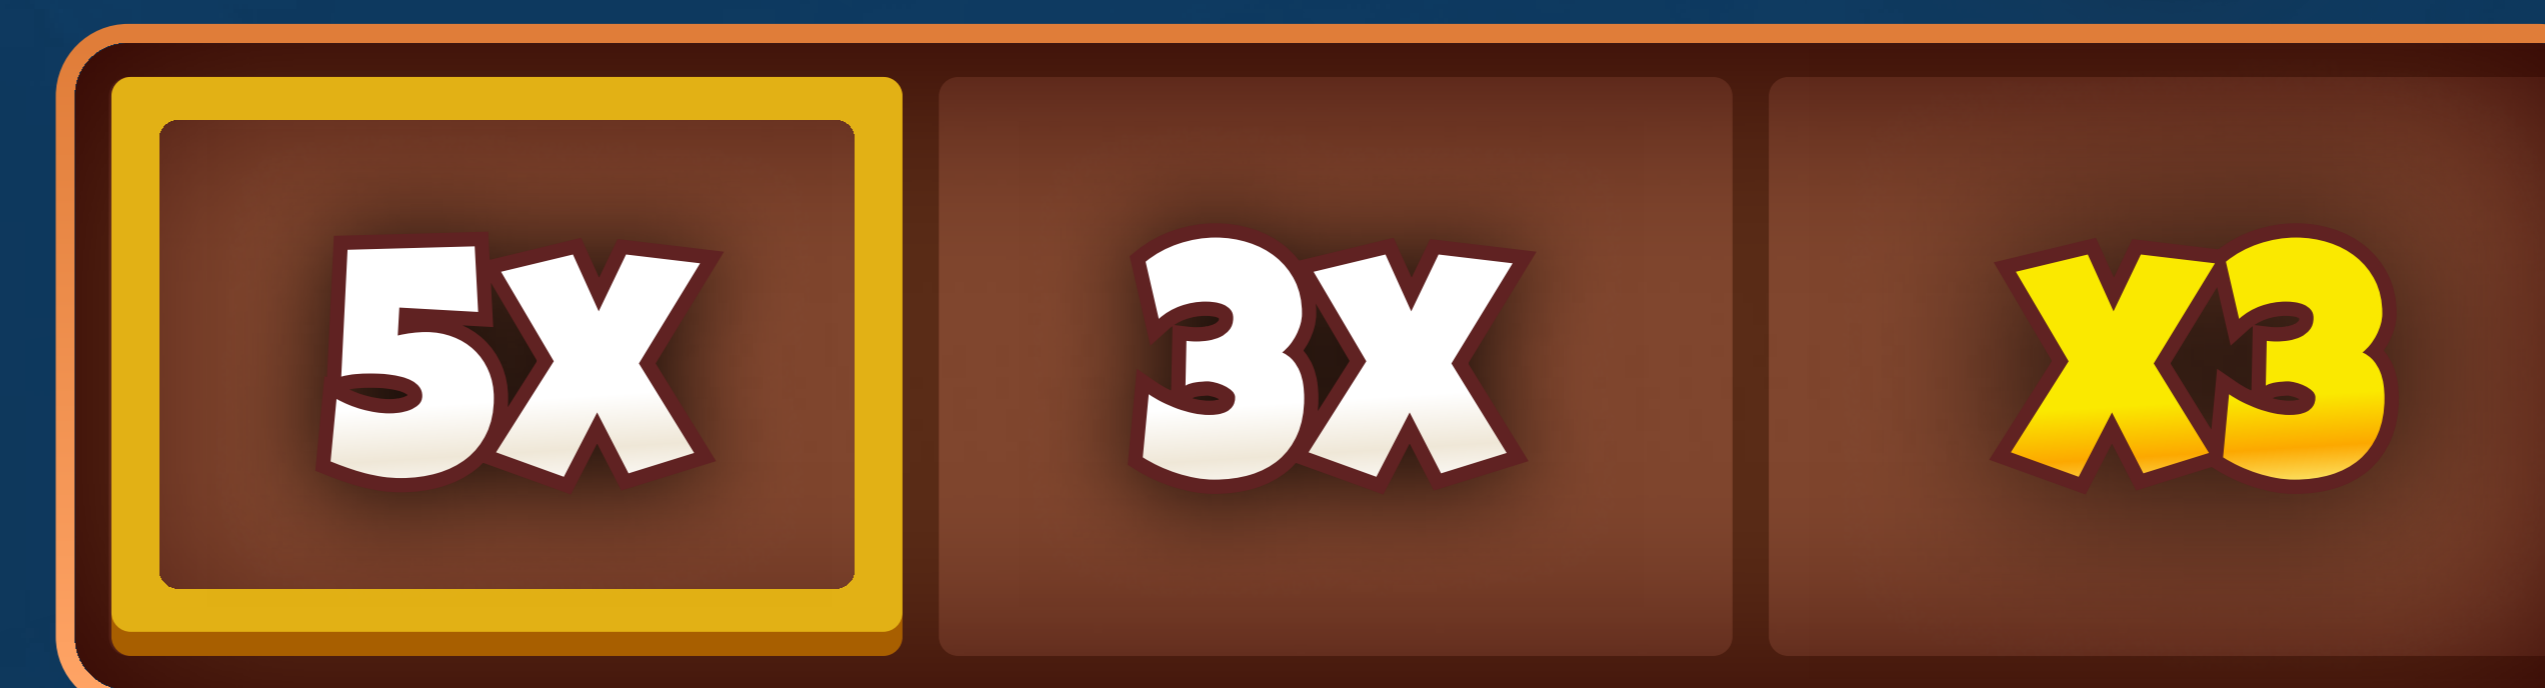

The Free Spins round is where the real magic happens. Land 3, 4, or 5 FS symbols to trigger 8, 12, or 15 free spins, respectively. This feature not only amplifies your chances for hefty wins but also adds an extra layer of excitement to every spin.

With the potential to win a **staggering 15,000 times your stake**, "Piggy Cluster Hunt" invites you to a world where each spin can unlock significant rewards. Are you ready to join our piggy friend in this delightful escapade, where every cluster could lead to a fortune hidden in the heart of the countryside?

FEATURES

PROGRESSIVE WIN MULTIPLIER

Above the reel is a multiplier bar with three slots.

Each spin draws zero to three win multipliers, each assigned to a position (first, second, third) in the bar.

The value of the first multiplier position is applied to the initial drop wins. After removing winning symbols and a new cascade, if there are additional wins, the first and second multipliers are added up and applied to those wins from the additional cascade. Following the second additional cascade, the first, second, and third multipliers are combined and applied to the wins from the second additional cascade. All wins from the third cascade onwards will have all three multipliers added up and applied to the wins.

A new spin will reset the multipliers, and three new values are drawn.

Multipliers can have additive and multiplicative values.

Possible additive multiplier values: 2x - 100x

Possible multiplicative multiplier values: x2 - x10

Note: During the base game, multiplier positions can also be empty. Empty positions during the base game mean no multiplier is applied, and wins follow the payable.

During Wild Call Free Spins, all three multiplier positions will have values, and no empty positions are present.

Multiplier values are applied sequentially. For instance, if there are 5x, x2, and 10x, the first set of wins uses 5x as the multiplier. For the second set of wins, the multiplier is 10x (resulting from 5x multiplied by 2), and for the third and subsequent wins, the multiplier is 20x ((5x multiplied by 2) plus 10x).

EXPLODING WILDS

When the Exploding Wild lands, it explodes and adds up to **8 extra Wild symbols** around the original Wild.

In the base game, a minimum of 2 extra Wilds are added.

During Wild Call Free Spins, a minimum of 4 extra Wilds are added.
