GAME DESCRIPTION

Forge Your Fortune in **Grunt Gold**!

Step into the dark dungeons where savage orcs guard their treasure hoards. **Grunt Gold** is a **6x4 cascading slot** with ways-to-win gameplay and a max win potential of **15 000x your bet**. The max win can be achieved in all game modes.

Token symbols fill three **Bounty Chests** — **Green, Blue, and Red** — each unlocking different boosts: **symbol clusters**, **added Wild symbols**, or **powerful multipliers**. Filling multiple chests at the same time can unleash chaotic combos across the grid!

Land **3 or more Scatter** symbols to trigger **Free Spins**, where all three **Bounty Chests** become progressive, building power throughout the feature for even more action. With every cascade, every **Token**, and every boost, the dungeon grows more intense.

With brutal orcs, deadly weapons, and treasure hidden deep in the dark, **Grunt Gold** is a battle for riches like no other.

FEATURES

BOUNTY CHESTS

Three Bounty Chests are displayed on top of the reels.

Token symbols add points to fill the Bounty Chests and trigger their boosts.

Green Bounty Chest

- 5 or 6 points: awards a cluster of 3 or 4 matching symbols to random positions on the grid.
- 7 points: awards a cluster of 5 or 6 matching symbols to random positions on the grid.
- Any paying symbol can be added, except Wild symbol.
- Added symbols will not replace existing Wild symbols.
- If no positions are available, fewer or no symbols are added.

Blue Bounty Chest

- 5 or 6 points: awards 1 or 2 Wild symbols at random positions on the grid.
- 7 points: awards 3 or 4 Wild symbols at random positions on the grid.
- Added Wild symbols will not replace existing Wild symbols.
- If no positions are available, fewer or no Wild symbols are added.

Red Bounty Chest

- 5 or 6 points: awards 2 or 3 multipliers to random symbols on the grid.
- 7 points: awards 4 or 5 multipliers to random symbols on the grid.
- Possible multiplier values: 2x, 3x, 4x, 5x, 10x.
- When symbols with multipliers are part of a win, their multipliers apply to that win.
- Multipliers placed on symbols that already have one are added together.
- When multiple symbols with multipliers are part of a win, their multipliers are added together and then applied to the win.

Green and Blue Bounty Chest boosts apply at the end of the spin once the grid settles. Red Bounty Chest boost applies immediately after cascade points are added.

If both the Green and Blue Bounty chests collect 5 or more points on the same spin, the Green Bounty Chest boost is applied first, followed by the Blue Bounty Chest boost.

After the boost is applied, points of that Bounty Chest are reset.

In the base game, all Bounty Chest points reset at the start of each spin.

TOKEN SYMBOL

Adds a random number of points to one Bounty Chest.

Points are added immediately when the symbol lands, after which the Token symbol is removed either with winning symbols or on its own if no win occurs.

Possible number of points that can be added: 1 - 7.

Rarely a Token symbol may add a random number of points to all three Bounty Chests at once.

Each chest can collect up to 7 points, after that no more points are added to that chest.
