GAME DESCRIPTION

Rule the Reels in **Crowned Corners!**

Step into the grid and rule every corner in **Crowned Corners**, a **5x5 cascading ways game** packed with clever twists and powerful features.

Each corner of the grid hides a Royal Tower that can reveal surprises — Wild symbols, Wild symbols with multipliers, or lines of matching symbols that expand your chances to win. Every spin, these cells can unlock something new!

Watch out for Wild symbols with multipliers that double their value after every cascade, building tension as they grow stronger with each win. When multiple Royal Towers activate at once, the screen fills with action and potential combinations!

Land 3 or 4 Scatter symbols at the same time to trigger Free Spins, where Royal Towers stay active and can award extra spins or more bonus features.

With up to 15 000x your bet on the line and nonstop cascading action, **Crowned Corners** rewards smart spins and lucky corners!

Can you conquer every corner and claim the crown?

The max win can be achieved in all game modes.

FEATURES

ROYAL TOWERS

There are **4 Royal Tower positions** on the grid: at the top and bottom of the first and last reels.

During the spin, each **Royal Tower can reveal a special symbol or stay empty.**

During cascades, any empty Royal Tower can reveal a **new special symbol or stay empty.**

The Royal Towers can reveal these special symbols

Wild symbol with a multiplier

The cell becomes an additional Wild symbol with a multiplier. Is permanent and remains on the grid until the end of the spin. With each win on the grid, its multiplier value doubles, the Wild symbol does not need to be part of the win for this to happen.

Possible multiplier values: 2x, 3x, 4x, 5x, 10x, 25x.

The multiplier is applied to any win that includes the Wild symbol with multiplier.

Wild symbol

The cell itself turns into an additional Wild symbol on the grid.

The Royal Tower locks the Wild symbol in place until it becomes part of a win.

When the Wild symbol participates in a win, it is removed along with the other winning symbols, and the Royal Tower becomes empty and may reveal a new special symbol during the next cascades.

Add symbols

A full line of matching symbols is added in one of three possible directions once the grid has settled.

Possible directions:

Any paying symbol, including a Wild, can be added.

While the grid is settling, the Royal Tower locks the special symbol in place.

Once the new symbols are added, the Royal Tower becomes empty and can reveal a new special symbol during the next cascade.

If a line already contains a regular Wild symbol or the same paying symbol, those symbols remain, and new ones are added only to the remaining available positions.

If several Royal Towers reveal Add symbols at the same time, they all add the same symbol, but in different directions so that their lines do not overlap.

If all four Royal Towers reveal Add symbols at the same time, symbols are added to the first reel, both diagonals, and the last reel.
