GAME DESCRIPTION

Plan the Escape in “Behind Bars: Masterplan”!

Behind Bars: Masterplan is a **6x5 cascading all-scatter game** set inside a high-security prison, where every move is part of a carefully timed escape. Wins are formed by matching 8 or more identical symbols, and each cascade reshapes the grid as new symbols drop into place.

Reel Multipliers appear above the reels and play a key role throughout the game, adding an extra layer to each win and evolving as cascades continue. As symbols clear and new ones fall into place, the layout can change quickly, creating different outcomes from spin to spin.

Trigger the **Bonus Game** to enter a **Hold & Win**-style feature focused on collecting instant win symbols while **Reel Multipliers** continue to build during the round. Each drop feels like another step in the escape plan.

With its strong theme, feature-driven gameplay, and a maximum win potential of **12 000 times your bet**, **Behind Bars: Masterplan** delivers a suspense-filled experience where timing, planning, and progression take centre stage.

The max win is available in all bonus game modes and in Surprise Inspection Feature Spins.

FEATURES

REEL MULTIPLIERS

50x
5x
20x

There are 6 multiplier fields, one above each reel.
On every spin, new random values are drawn for these fields.

Possible values: 1x, 2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x, 15x, 20x, 25x, 50x, 100x.

If at least one symbol on a reel participates in a win, that reel's multiplier is applied to the win.

If multiple reels with multipliers higher than 1x participate in the same win, their values are summed up before being applied to the win.

After win calculation when the symbols are removed, 1 or 2 random reels receive a multiplier boost.

Possible additive values: 1x, 2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x, 15x, 20x, 25x, 50x, 100x.

Possible multiplicative values: x2, x3, x4, x5, x6, x7, x8, x9, x10.

Reel Multipliers are progressive during cascades but reset at the start of a new spin in the base game.

Note: The maximum reel multiplier value is 24 000x.

ESCAPE PLAN

3  symbols trigger the **Bonus game**.

This **Bonus game** uses a new mechanic described below.

All **Reel Multipliers** start from 1x.

Reel Multipliers are progressive and do not reset for the duration of the bonus.

The **Bonus game** is a **Hold and Win feature** played on the same grid as the base game.

The game starts with 3 spins. Each time a new non-blank symbol lands, the spins reset to 3. If the spins reach zero, the feature ends.

All wins are collected and displayed in the Total Win field and will be awarded at the end of the bonus game.

During the spin all the cells spin.

None of the symbols that land are sticky, they perform their action and are removed on the next spin.

Following symbols can land during the **Bonus game**:

Blank cell

Does not pay out and has no other effect.

- Instant Win symbols apply their Reel Multipliers and the values are added to the Total Win field.

Search party

Triggers randomly if a spin results in no new symbols.

When it happens 2, 3, or 4 **Instant Win** symbols are added to random empty cells.
