GAME DESCRIPTION

Explore the Reef in “Clawsy Collector”!

Clawsy Collector is a **6x5 cascading all-scatter game** where wins are formed by **8 or more matching symbols** anywhere on the grid.

As symbols drop and cascade, collected symbols help unlock special booster features that can add **Wild symbols**, remove low symbols, or increase the **Global Multiplier**.

Trigger the bonus game to continue collecting symbols across multiple spins and activate boosters several times during the feature.

With its playful underwater theme and a max win potential of **15 000 times your bet**, **Clawsy Collector** offers a lively, collection-driven experience.

The max win can be achieved in all game modes.

FEATURES

GLOBAL MULTIPLIER

X1

Default value is **1x**.

Applied to all the wins.

During the base game it resets with each new spin.

GRID BOOSTERS

All winning symbols are counted during the spin. Reach below milestones by the end of the spin to unlock Grid Boosters:

- **30-39 symbols to get 1 random Grid Booster from following two: Remove Low symbols, Add Wild symbols.**
- **40-49 symbols to get 2 random Grid Boosters from the following three: Add Global Multiplier, Remove Low symbols, Add Wild symbols.**
- **50+ symbols to get all 3 Grid Boosters: Add Global Multiplier, Remove Low symbols, Add Wild symbols**

Boosters are applied when the grid is settled, in a specific order without grid settling between. Grid Boosters are applied in the following order:

- **Add Global multiplier**
- **Remove low symbols**
- **Add Wilds**

When Boosters are applied, the winning symbol counter resets and counting starts again immediately, meaning it's possible to collect 30 or more symbols several times during the spin. In the base game the counter also resets at the start of every new spin.

Add Global Multiplier

A random value is added to the current Global Multiplier value.

Possible values: 1x, 2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x, 15x, 20x, 25x, 50x, 100x.

Note: Add Global Multiplier Booster can only be awarded when 2 or 3 Grid Boosters are received at the same time.

Remove Low Symbols

All low-paying symbols are removed from the grid.

Remaining high-paying symbols cascade down, and only new high-paying symbols drop in to fill the empty spaces.

FS Scatter symbols remain on the grid.
